Executive Summary

Thank you for your interest in Circularo, a leading platform for secure electronic signatures in the GCC.

This is a confidential commercial proposal for Circularo Enterprise Subscription.

The Enterprise Subscription is licensed on a per-user basis and provides unlimited document transactions per licensed user. It is designed for organizations requiring up to XX licensed Regular users, while allowing an unlimited number of external recipients and signers.

Circularo is a modern enterprise platform for digital approvals, electronic signatures, secure collaboration, document management, and long-term document archiving.

The platform is designed for organizations that require the highest standards of security, regulatory compliance, data governance, and efficient digital collaboration. In addition to commercial organizations, Circularo is trusted by government institutions, public sector organizations, and strategic enterprises throughout Europe and the Gulf region.

Circularo is hosted in Microsoft Azure data centres located within the UAE and supports the creation of Advanced Electronic Signatures in accordance with the eIDAS Regulation.

The platform is certified according to ISO 9001, ISO 27001, ISO 27017, and DESC CSP Certified. The application is multilingual and fully Arabized with both Arabic RTL and English LTR user experience.

Circularo is far more than an electronic signature solution. Every subscription includes a comprehensive platform enabling organizations to:

- prepare, create, and manage documents
- electronically approve and sign documents
- monitor document status with complete audit trails
- organize and archive contracts and corporate documents
- complete and sign PDF forms
- securely share documents and collaborate across teams
- integrate with Microsoft 365, Microsoft Teams, Microsoft Office Online, Google Workspace, Collabora Online, and other enterprise systems
- securely preserve documents for long-term retention
- automate document-driven business processes

By combining enterprise-grade security, operational flexibility, and extensive experience delivering solutions for both enterprise and government organizations, Circularo provides a long-term platform for digital transformation across the entire document lifecycle.

Today, Circularo is used by organizations of all sizes—from growing businesses to multinational enterprises, government institutions, and shared government service providers. Reference implementations include nationwide government digital services in the United Arab Emirates, deployments across dozens of public-sector organizations, and large-scale projects in infrastructure, energy, transportation, finance, and manufacturing.

From start to finish

Track and manage the entire lifecycle of your documents in Circularo and maintain control in every step of the process.

Prepare

Create and edit documents, PDF forms, and reusable templates.

Track

Stay up to date with the status of each document in real time.

Sign

Send signature requests and verify the identity of each recipient.

Organize

Archive and categorize signed documents using folders, labels, and filters.

Documents you can really trust

Circularo contains a variety of security measures. Our digital signatures contain verifiable electronic certificates that allow anyone to easily verify the authenticity and integrity of PDF documents.

For seamless identity verification, our solution can also be integrated with any national or enterprise digital identity provider with our Universal Digital Identity Framework.

Circularo provides an **easy way to sign documents online** thanks to highly **secure and verifiable digital signatures**.

Beyond just eSignatures, Circularo is a **smart online space** designed to simplify and accelerate all your **personal and business paperwork** and digital tasks.

Digital signing and approvals

Smart document management

Online PDF forms.

Strong security features

Customers who Agreed on Circularo

Commercial Terms & Pricing

This annual subscription is licensed based on the number of document transactions and includes up to **XX document transactions per organization per year**, unlimited licensed Regular users, and an unlimited number of external recipients and signers.

A Regular User is a licensed internal user with full access to the Circularo platform. External recipients and signers do not consume user licenses and are therefore not counted towards the licensed user limit.

For a detailed explanation of licensing terminology, including **transactions**, **user types**, and other licensing principles, please refer to the **Circularo Sales & Licensing FAQs**:

<https://www.circularo.com/terms/faqs/>

Every Circularo subscription includes secure archiving of all documents processed through approval and signing workflows. Completed transactions, associated documents, certificates, and audit trails are securely retained and remain available for future search, review, compliance, and auditing purposes.

Organizations wishing to manage additional corporate documents outside approval and signing workflows may extend the platform with the optional **Document Management & Archiving** module.

All prices are quoted for a 12-month subscription period and are exclusive of VAT and any applicable taxes.

Requirements for Add-on Activation

Circularo offers a wide range of optional add-ons and platform extensions that can be ordered and activated at any time according to the customer's business requirements.

Certain add-ons may require additional configuration, integration with third-party services, custom branding, or customer participation during the activation process.

Where no customer input is required, ordered add-ons are typically activated within **three (3) business days** from the date of the order.

If customer involvement or cooperation from a third party is required, the add-on will be activated within **ten (10) business days** after all required information has been provided and all activation prerequisites have been fulfilled.

Some add-ons—such as electronic identity services, qualified trust services, qualified certificates, or integrations with external systems—may also be subject to the procedures, requirements, and service conditions of the respective third-party providers.

A summary of selected add-ons and platform extensions is provided in **Appendix C – Optional Add-ons and Platform Extensions**.

Service Activation & Payment Terms

This proposal is governed by the **Circularo General Terms and Conditions**, available at: <https://www.circularo.com/terms/general/>

For a detailed explanation of Circularo licensing principles, please refer to the **Circularo Sales & Licensing FAQs**: <https://www.circularo.com/terms/faqs/>

Subscription Activation: From the effective date of the subscription, the Customer and its authorized users may use the Circularo platform within the scope defined by the purchased subscription plan.

The subscription includes the **Circularo Standard Support Plan**, as described in the applicable service documentation. Standard Support does not include custom development, professional services, bespoke configurations, or third-party integrations, which must be purchased separately where required.

License Notice: User licenses remain allocated until users are deactivated. Both active and suspended users therefore count towards the total number of licensed users.

Unless a **30-day trial** has been provided in advance, access to the Circularo platform will be activated upon issuance and acceptance of the subscription invoice.

Where the Customer has previously used a trial environment, production access will be activated after payment has been received.

Payment Terms

All fees relating to access to the Circularo platform and associated services must be paid within the payment period specified by Circularo.

Unless otherwise stated, invoices are payable within **30 days** from the invoice issue date.

Subscription Renewal

Prior to the expiration of the subscription term, Circularo will notify the Customer of the upcoming renewal.

We highly value the trust our customers place in us and are committed to delivering services of the highest quality. Should you have any questions regarding your subscription renewal, please contact either our Customer Success team or your designated commercial representative.

Renewal Invoice: A renewal invoice will normally be issued approximately **30 days before** the end of the current subscription period, providing sufficient time for internal review and payment processing.

Payment: To ensure uninterrupted access to the Circularo platform, payment for the renewal period should be received before the subscription renewal date.

Scope of the Proposal

Unless explicitly stated in this proposal, the subscription **does not include** any additional add-ons, custom developments, bespoke configurations, professional services, or other customizations.

Circularo does not provide custom electronic forms, workflow development, permission configuration, templates, or third-party integrations as part of this proposal unless they have been explicitly ordered.

Circularo accepts no responsibility for customizations, configurations, or integrations performed by parties other than Circularo.

A separate testing or staging environment is **not included** in this subscription.

For technical support, user documentation, training materials, and quick-start guides, please visit: <https://help.circularo.com/>

Appendix A - Circularo Business Subscription Plan

✓ - included

\$ - optional Add-Ons or capabilities that can be purchased at extra cost

Core Features

Legal Binding Digital Signatures	✓	Circularo eSignatures are legally binding and enforceable under the European Union eIDAS (EU No.910/2014), the 2000 U.S. Electronic Signature in Global and National Commerce Act (ESIGN), and the Uniform Electronic Transactions Act (UETA).
Enterprise Grade Security	✓	Your documents are protected by SSL encryption and secure server infrastructure hosted at a state-of-the-art SOC 2, HIPAA and ISO 27001 certified data centre. With Microsoft Azure cloud being one of the most secure providers around, you can always feel confident about your data.
Secure Storage Space	✓	Your files are stored in a secure, safe, and reliable environment, encrypted in Microsoft Azure cloud and automatically backed up. All files contain a detailed audit trail and document history activity tracking.
PDF Compliant eSignatures	✓	Sign PDF documents with internationally recognized AATL compliant electronic certificates and use standard forms of electronic signatures according to industry standards and existing regulations.
Smart Document Management	✓	Organize and categorize documents in folder structures and choose who can view or edit them. Label or link files to group them together, manage their validity and visibility, create filters for easy search.
Powerful Fulltext Search	✓	Find things quickly with multilingual full-text search and highlighting. Search through the titles, descriptions and contents of files for keywords or base your search on criteria such as who, when, and how interacted with the document.
Built-in Document Preview	✓	Get an instant preview of each document and navigate across pages easily. Search within the document content to highlight important information. Preview is supported for most popular document formats like PDF or MS Office.

Easy and Secure Sharing	✓	Ensure that your documents are securely delivered to their intended recipients and get notified as soon as they are opened. Verify recipient identity through various authentication methods. Set and manage deadlines and document access duration.
Multi-Language Support	✓	Circularo interface fully supports most left-to-right and also right-to-left written languages. Arabic users can enjoy a fully Arabized user interface with built-in multilingual capabilities. Set language preferences for external recipients.
Mobile Access	✓	Sign on the go. Capture documents with your mobile camera, sign them, or share them with others. Manage your signing processes from the mobile app.

eSigning and Approvals Capabilities

Versatile eSignatures	✓	Use handwritten, typed, image-based, or biometric signatures. The result is always the same; electronically signed PDF document with a valid electronic certificate.
Remote Signing	✓	Share and sign documents online.
Processing Deadlines	✓	Set due dates (processing deadlines) when signing documents.
eSigning Workflows	✓	Easily define the flow of actions, deadlines, and responsibilities for all participants of your eSigning workflow. Select one or multiple recipients and use sequential, parallel, or mix mode signing. Save your workflows with set roles for each signatory and reuse them later.
eStamping	✓	Sign documents using visual stamps secured with electronic certificates.
Visual eStamp Designer	✓	Create, upload, or design your own stamps thanks to a built-in stamp designer tool.
eSigning Initials	✓	Use handwritten, typed, image-based, or biometric initials.
Multipage Signing	✓	Sign multiple pages at once using initials, signatures, or stamps.
Multiple	✓	Add basic signature fields (signature, initials, stamps) to documents for

eSigning Fields		yourself and other signatories.
Advanced Form Fields	✓	Add advanced input fields (Date, Text, Multiline Text, Check box, List, Email, Phone, Image, QR Code, etc.) to documents for yourself and other signatories.
Reject with Annotations	✓	Add annotations and comments to documents you reject to sign, explaining your reasons for rejection and suggesting adjustments.
Custom Field Library	✓	Save individual fields or groups of fields as custom fields and reuse them across documents in one click. Preserve custom settings such as placeholders, tooltips, masks, or entire field combinations to speed up document preparation and ensure consistency.
Wacom Signature Pads Support	✓	Compatible with leading sign-here devices like Wacom signature pads, including biometric signatures.
Capture Signature with Mobile Device	✓	Create a handwritten signature on your mobile and transfer it to your desktop in real-time. Simply scan a QR code, draw your signature with a stylus or hand, or scan a paper signature using your phone camera - seamlessly integrated into your signing process.
Online Document Verification	✓	Verify the authenticity and integrity of any document signed in Circularo online using the Circularo verification tool.
Personal eSigning Templates	✓	Save your prepared documents in the form of a template and reuse them repeatedly. Complete with signatories and the signing order, signature placeholders, and other fields.
eSealing with Electronic Certificates	✓	Secure your documents with invisible electronic seals containing an electronic certificate without the need for a visual representation of a signature.
Multiple Document Signing	✓	Sign multiple documents in a single session.
Bulk Document Sending	✓	Send personalized documents to hundreds of recipients using CSV import and mapping. The Bulk Share wizard supports multiple recipient roles, built-in validation, and background batch processing.

Document signing with attachments	✓	Add view-only attachments to your documents during the signing process.
Individual Recipient Settings	✓	Customize the signing experience for each recipient with unique verification methods, deadlines, reminders, permissions, private messages, and preferred notification languages. This feature provides flexibility while keeping the option for collective settings.
Organisational stamps	✓	Organizational stamps are tied to your company identity, not to a specific user. Only users with the appropriate permissions can apply them, and admins can revoke access at any time to maintain control and security – this ensures compliance with internal policies by restricting the use of corporate stamps and enhances document security by preventing unauthorized stamping.

Team Capabilities

User Management	✓	Manage the members of your organization. Add, delete, or suspend users.
Lite user role	✓	A cost-effective user type with limited access, available in three roles: Prepare Only, Sign Only, and Read Only.
Team Management	✓	Create and manage teams and their members within your organization.
Team Level Permissions	✓	Choose which users and teams have access to which documents and folders and templates contacts
Shared Folders	✓	Store and organize documents in shared folders that are accessible to selected teams or members. Manage who can view or edit them.
Shared eSigning Templates	✓	Distribute templates accross the whole organization or to selected teams or members only.
Template Locking	✓	Lock templates to prevent unauthorized changes.

Shared Contacts	✓	Share your contacts accorss the whole organization or with selected teams or members only.
Shared Labels	✓	Share labels (document and folder tags) across the whole organization.
Organization Administration	✓	Have a greater control over organization-wide settings, enforcing uniform rules for deadlines, signature types, signing order, and cloud integrations. This ensures compliance, security, and consistency across all document processes.

Security and Data Protection

Enterprise Grade Encryption	✓	All the data is encrypted using 256-bit AES and SSL/TLS encryption in transit and at rest.
Strong Authentication and Verification	✓	Optional 2-factor authentication at login - choose from email or SMS based OTP, 3rd party app authentication, or SSO oAuth through another account or a national digital identity provider.
Content and eSignature Verification	✓	Verify that the document's content has not been changed after signing.
Mobile App Multi Factor Authentication	✓	Authentication with Time-based One-time Password (TOTP) 3rd party applications like Microsoft Authenticator, Google Authenticator, and others.
oAuth 2.0 Single Sign-On	✓	Use your existing accounts like Microsoft Office, Google, LinkedIn to sign up and login to Circularo.
Email based Identity Verification	✓	Recipients and signatories are identified through their email by default.
Detailed Audit Trail	✓	Each document has its own audit trail that shows its complete history and displays all actions done to it in chronological order, as well as the information about who participated in those actions.

Verifiable PDFs	✓	Ensure that the integrity and authenticity of your agreements can be verified, either on our verification page or with common tools such as Adobe Reader.
Unique QR Code Document Identification	✓	Generate a QR Code containing a unique ID for identifying completed documents.
Access Control Permission	✓	Gain complete control over your security access and permissions. Manage access permission for your users and teams on document or folder level. Set extra verification steps for external recipients accessing your shared documents.
SAML 2.0 Single Sign-On	✓	Authenticate your users using SAML Single Sign On SSO by leveraging a single set of existing login credentials in your organization.
Automated User Provisioning (SCIM)	✓	Synchronize users, groups, and access permissions directly from your organization's SCIM-compatible identity provider. Whether you use Microsoft Entra ID, Okta, Google Workspace, or another SCIM-enabled directory, user onboarding, role changes, and deprovisioning happen automatically without manual administration.
Identity Verification of the Signatories	✓	Set verification steps for each recipient of your document, requiring them to provide additional information to prove their identity. Choose from multiple options on how to verify signatories.
UAE Pass Identity Verification (UAE only)	\$	Use UAE national identity provider UAE Pass to verify signatories and external recipients or authenticate internal users.
UAE Pass Signing (UAE only)	\$	Use UAE national identity provider UAE PASS to sign a document with a UAE PASS issued certificate.
NAFATH Identity Verification (KSA only)	\$	Use KSA national identity provider Nafath national identity to verify external recipients of your documents or authenticate internal users.
Document Ownership Transfer	✓	Transfer ownership of documents between users.
Comprehensive Audit Logs	✓	Track all user and system activities with detailed logs, including document actions, sharing, workflow execution, and security events. Ensure

compliance, transparency, and accountability with timestamped records and advanced filtering options.

Document Management Capabilities

Document Level Security	✓	Manage access rights for each individual document.
Document Lifecycle Timeline	✓	Detailed document history.
Document Versioning	✓	Version control for all documents you create or upload.
Document Expirations	✓	Manage document validity and be automatically reminded once the document is about to expire.
Private Documents	✓	Private documents are by default visible only to you unless you share them with someone else.
Folders and Files Tagging	✓	Add custom labels (tags) to any document or folder to easily categorize them and facilitate a powerful tag-based search.
Email Preview	✓	Preview MSG or EML emails including their attachments.
Smart Preview	✓	Quick thumbnail document previews, full preview of the document content, content summary snippets while searching including document details such as standard and custom fields and metadata.
MS Word Templates	✓	Create reusable MS Office documents and store them as templates directly in Circularo. New documents can be easily created based on such templates and approved or signed electronically.
Document Linking	✓	Create links between documents to easily find all related files.
Attachments	✓	Add attachment to any document.
PDF Annotations	✓	Highlight, draw, annotate with text, add images and comments directly on top of any PDF document.
Individual	✓	Delegate documents that are in your Inbox to another for processing.

Document Delegation		
Automatic Document Delegation	✓	Set up a period of time during which all incoming documents will be automatically delegated to another user of your choice to process the documents in your stead.
Advanced Search	✓	Advanced search helps you find literally everything - documents, contacts, notes.
Custom Views	✓	Custom views from saved filters help you organize your documents across all folders keeping you focused on what's important for you.
Global Filters	✓	Filters across all documents and folders help you search for the exact documents you need - with the option to combine multiple for an even more sophisticated search.
Attachment Visibility	✓	Attachments can be made accessible to external recipients – or kept private for internal users only.
Submitted attachment files	✓	Ability to add an immutable attachment by external and internal signatories during the signing process.
Document Management & Archiving	\$	Enables centralized storage, search, and governance of standalone documents within Circularo. While transactional documents are always included in the platform, this archiving add-on extends capabilities to manage all non-transactional content with metadata classification, indexing, access control, and compliance-based retention - ensuring all business documents are organized, secure, and audit-ready.
Additional Archiving Storage	\$	Increase the archival storage capacity available to your organization beyond the storage included with the Document Management & Archive Add-On. Additional storage is allocated to the shared organizational archive and applies exclusively to standalone documents managed within the DMS repository. An active Document Management & Archive Add-On subscription is required.

Collaboration and Productivity

MS Office 365 Online	✓	View, create, or edit MS Office documents directly in Circularo app and have them signed right away.
Activity Tracking	✓	Get a detailed overview of the document processing timeline. Stay informed about any status updates, changes, views, or actions related to your documents.
Notifications & Reminders	✓	Get notified about important events and status updates of your documents. Be reminded about approaching deadlines or documents that are about to expire.
Scheduled Reminders	✓	Schedule automatic reminders and deadline notifications for the recipients of your documents or the entire organization.
Actionable Views	✓	Get an instant overview of which documents are waiting for you or for someone else, what's completed, and what is pending.
Comments with mentions	✓	Leave comments on documents, use hashtags and asperands to mention other documents or users, and receive responses in real time.
Personal Search Filters	✓	Create custom filters to immediately access specific search results.
Export of Search Results	✓	Export selected records or search results to XLS or CSV.
Standard Reports	✓	Gain full visibility into document transactions, user activity, and workflow efficiency with powerful reports. Export insights in Excel or CSV to track transaction trends, analyze success rates, and optimize processes for better decision-making.
Public and Internal Comments	✓	Control comment visibility by marking them as public for external recipients or internal to keep them private within your organization. This ensures sensitive information stays protected while enabling efficient collaboration.
cDocs - Collabora Online	\$	Enables real-time document creation and collaborative editing directly within Circularo's on-premise solutions. It ensures full control over sensitive corporate data while meeting strict data residency and privacy requirements, ideal for organizations prioritizing digital sovereignty.

Integrations

Google Suite	✓	Send your Google docs, sheets, or slides to Circularo where you can sign or
--------------	---	---

Add-In		archive them securely.
MS OneDrive Integration	✓	Send documents from Circularo directly to your Microsoft OneDrive and vice versa.
DropBox Integration	✓	Send documents from Circularo directly to your Dropbox and vice versa.
MS SharePoint Integration	✓	Send documents from Circularo directly to your Microsoft Sharepoint and vice versa.
Autodesk BIM 360 Integration	\$	Send documents from Circularo directly to BIM360 and vice versa.
MS Outlook Add-On	✓	Send email attachments from Outlook to sign or archive them in Circularo.
MS Office 365 Add-In	✓	Send files from MS Word, Excel and PowerPoint on your desktop directly to Circularo, where you can sign or archive them.
MS Teams Add-In	✓	Send .doc and .docx documents from MS Teams on your desktop directly to Circularo, where you can sign or archive them.
Google Chrome Extension	✓	Send .doc, .docx, and PDF files opened in Google Chrome on your desktop directly to Circularo, where you can sign or archive them.
Sandbox Access	✓	The Circularo sandbox is a dedicated, risk-free testing environment for developers and enterprises to build, integrate, and test document workflows and e-signature APIs without affecting live production data.
Custom Integrations	\$	Build custom applications and integrations using the Circularo REST API. Connect Circularo with external systems, automate workflows, and develop tailored solutions to meet your business needs.

Add-Ons

Pre-Fill Documents with 3rd-party	✓	Automatically import data from third-parties into documents and pre-populate fields for faster, more accurate document creation.
-----------------------------------	---	--

Data

[Trusted and Certified Timestamps](#)

Add a trusted, legally recognized timestamp certificate issued by a Certificate Authority to prove the date and time at which information was added or changed.

[Custom Email Identity](#)

Send Circularo email notifications from your own mail servers and domain (e.g., myemail@mycompany.com), ensuring a trusted experience for recipients. All signed documents and attachments remain archived and traceable within your email infrastructure.

[Custom Branding and Styling](#)

Personalize logos and color schemes across the Circularo platform and email notifications to match your organization's identity. Create a seamless, branded experience that integrates effortlessly with your internal systems. (Note: Interface and email text remain unchanged.)

[Custom Domain](#)

Adds the ability to access Circularo app from your own domain, e.g myapp.company.com (instead of circularo.com)

Custom Electronic Signing Certificate

Get your own internationally recognized AATL compliant electronic certificate to digitally sign and seal all your documents in Circularo.

REST API

REST API add-on for custom integrations and process automation with 3rd party apps.

80 MB Transaction Limit

Increase the maximum size of uploaded and signed documents to 80MB (default is 40MB per single or merged document).

Signature Provider Selection

During the signing session select your preferred signature provider: Circularo (default) or a third-party provider (like UAE PASS).

PDF Form Field Recognition

When uploading PDF Form Circularo will automatically recognize fields in the PDF documents so you can quickly reuse existing PDF Forms and save them as templates.

Custom Web Forms

Add a public web form published on an external website that can be accessed by web users to submit data or collect documents. Users can initiate and automate the approval signing process of these documents

		within Circularo.
Custom Upload Form	\$	Customize the entry fields at document upload so that different types of documents can be categorized or classified further. Include additional metadata according to your needs.
Custom Company Name	\$	Replace the default "Circularo" name with your own brand ("powered by Circularo") for a fully personalized experience. Requires with Custom Branding & Styling to seamlessly integrate Circularo into your internal systems.
Advanced Reporting	✓	Unlocks powerful analytics with the Detail Transaction Report and Pending Transactions Report, giving businesses full visibility into document workflows, approvals, and pending actions.
Signature Mode Selection	✓	Enables organizations to choose between Composite Signatures, which use a single electronic certificate to seal the completed document, and Individual Signatures, which apply a dedicated electronic certificate to each signing event. This provides greater flexibility to meet specific compliance, traceability, and non-repudiation requirements.
Transaction Controller	✓	The Controller role helps monitor transaction flows, resolve bottlenecks, and unblock stuck documents. With metadata preview and ownership transfer capabilities, controllers can take over transactions or reassign them to the right person for further action.
KYC Liveness Verification	\$	Ensure the genuine presence of an identity holder with Active Liveness (selfie video with prompts) or Passive Liveness (short selfie video without prompts). Identomat's biometric liveness solution is iBeta Level 2 certified (ISO30107-3), preventing spoofing via photos, videos, masks, or deepfakes.
KYC Identity Verification	\$	Verify an individual's identity by scanning their government-issued ID, matching it with a biometric selfie with liveness checks. Supports 1,000s of ID types across 190+ countries, delivering global coverage and compliance.
AI Document Assistant	✓	AI Document Assistant enhances productivity by automatically summarizing documents and extracting key insights, enabling users to quickly understand and act on content. It also intelligently classifies documents (category,

		sensitivity, and PII) to strengthen compliance, security, and governance, seamlessly supporting workflows and access control. Note: This add-on requires the customer to provide and manage their own AI model credentials/API keys (Bring Your Own AI Key). AI model usage and associated consumption costs are billed directly by the selected AI provider.
eIDAS Qualified Electronic Signatures (QES)	\$	Add qualified electronic seals to safeguard document origin and authenticity. Certify that files truly come from your organization, not an individual user. Ensure business-wide non-repudiation.
Contract Deadlines & Renewals	✓	Manage contract terms, renewals, reminders, and non-fixed-term agreements in one place. Automated classification and centralized controls keep contracts active, compliant, and on schedule.
eIDAS Qualified Seal	\$	Add qualified electronic seals to safeguard document origin and authenticity. Certify that files truly come from your organization, not an individual user. Ensure business-wide non-repudiation.
SMS OTP	\$	Add an extra layer of security with optional two-factor authentication. Users can verify their identity using one-time passwords (OTP) delivered via SMS, providing a simple, secure, and convenient way to protect access and confirm user identity.
SMS Reminders	\$	Keep signing and approval processes moving with automated SMS reminders. Send timely notifications to signers, approvers, and other process participants, reminding them of pending actions and helping reduce delays while improving completion rates.
Onboarding & Training	\$	Our team provides initial training sessions and consulting time for key users on how to use the Circularo system effectively, how to apply customers' use cases and how to improve internal processes.
Privacy Controls — Hide IP & Location	\$	Hide participant IP addresses and location information from customer-facing documents, verification pages, signature details, and Certificates of Fulfilment to meet organizational privacy requirements.

Appendix C - Add-ons and Platform Extensions

Included

AI Document Assistant

AI Document Assistant brings advanced artificial intelligence capabilities directly into Circularo.

Users can analyze documents with a single click and instantly receive recommendations for document classification, tagging, sensitivity assessment and detection of Personally Identifiable Information (PII).

The assistant also automatically generates concise document summaries in both paragraph and bullet-point formats, enabling users to understand document contents without reading the entire file.

AI Document Assistant improves productivity, streamlines document management, and promotes consistent governance across enterprise document repositories.

More information: <https://help.circularo.com/en/add-on-ai-assistant>

SAML 2.0 Single Sign-On (SSO)

Enables integration with enterprise identity providers such as **Microsoft Entra ID (Azure AD)**, **Okta**, **Keycloak**, and other SAML 2.0-compatible solutions.

Users authenticate using their existing corporate credentials, allowing organizations to centrally manage authentication, security policies, and user lifecycle management.

The result is improved security, simplified administration, and a seamless sign-in experience without separate Circularo passwords.

More information: <https://help.circularo.com/en/add-on-saml-2-0-sso>

SCIM – Automated User Account Management

Enables automatic synchronization of users and groups between your corporate directory and Circularo. User creation, updates, deactivation, and group assignments are performed automatically based on changes in your central identity management system.

This eliminates the need for manual user account management, reduces administrative workload, and minimizes the risk of unauthorized access caused by outdated user records.

Custom Email Identity

Allows Circularo system notifications and signature requests to be sent using the organization's own email domain, for example:

- `signatures@company.com`
- `noreply@company.com`

Recipients communicate directly with the trusted identity of your organization rather than a generic service provider address.

This strengthens brand recognition, improves recipient confidence, increases signature completion rates, and helps reduce phishing risks while giving organizations full control over email communication and auditing.

More information: <https://help.circularo.com/en/add-on-custom-email-identity>

Custom Domain

Allows Circularo to operate under your organization's own domain, for example:

- `https://sign.company.com`
- `https://circularo.company.com`

This creates a fully branded experience for both internal users and external recipients while reinforcing your organization's digital identity.

More information: <https://help.circularo.com/en/add-on-custom-domain>

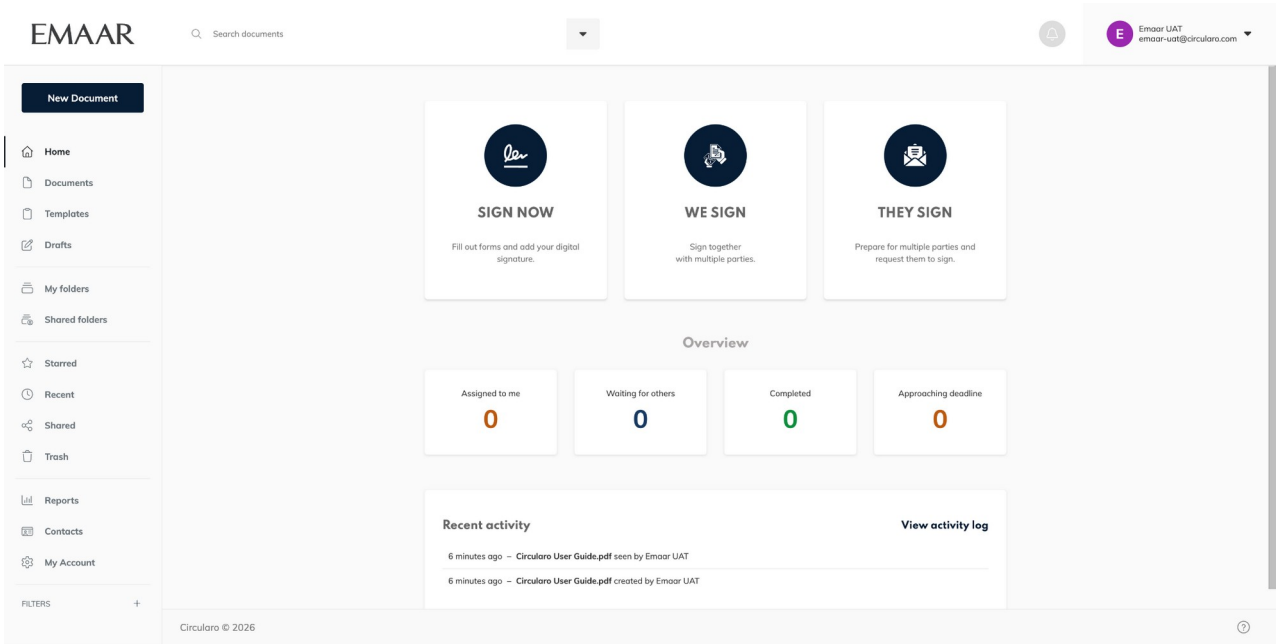

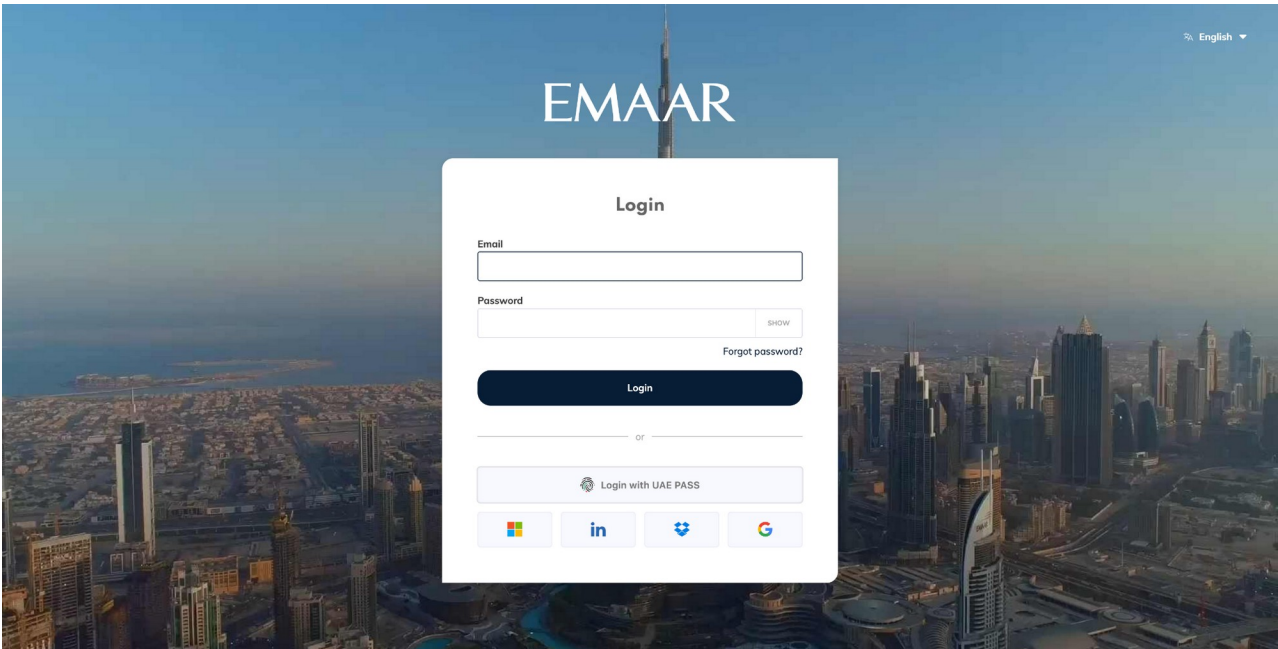

Custom Branding

Customize the appearance of Circularo to match your corporate identity.

Supported customizations include:

- replacing the Circularo logo with your own,
- customizing application colors,
- branding email notifications,
- delivering a consistent visual identity across both web and mobile applications.

More information: <https://help.circularo.com/en/add-on-custom-branding-and-styling>

Hello Adam Smith,

Emaar UAT is sending you a Circularo document ([TEST NDA.pdf](#)) and asking you to sign it.

Once the document has been processed, all parties will receive a final PDF copy via email.

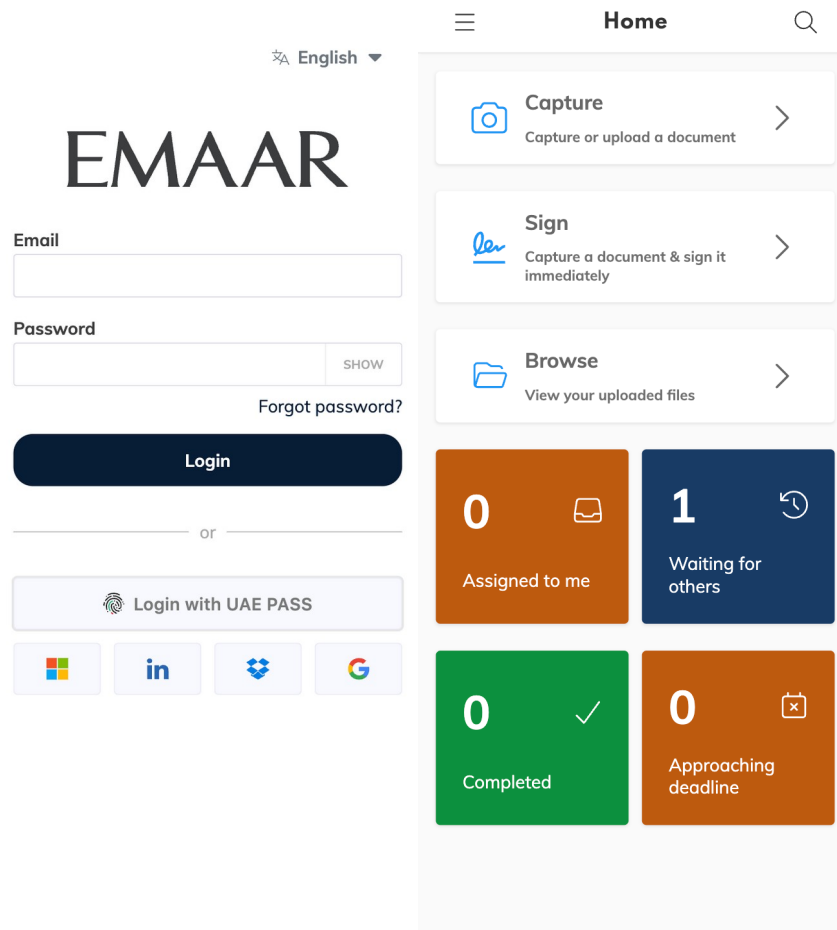

OPEN DOCUMENT

This is a notification from Circularo.

Don't like these emails? [Unsubscribe](#).

This email was sent to adam.smith@circularo.com

EMAAR

The image shows a mobile application interface for EMAAR. On the left is a login screen with fields for Email and Password, a 'Login' button, a 'Forgot password?' link, and social login options for Microsoft, LinkedIn, and Google. On the right is a 'Home' dashboard with a sidebar menu. The dashboard features three main action cards: 'Capture' (capture or upload a document), 'Sign' (capture a document & sign it immediately), and 'Browse' (view your uploaded files). Below these are four status cards: 'Assigned to me' (0), 'Waiting for others' (1), 'Completed' (0), and 'Approaching deadline' (0).

Optional

eIDAS Qualified Electronic Signatures (QES)

This optional add-on enables users to create Qualified Electronic Signatures (QES) directly within Circularo using Starcos 3.7 DI NFC smart cards or USB cryptographic tokens.

The solution utilizes a certified Qualified Signature Creation Device (QSCD), meeting the highest security and legal requirements defined by the European eIDAS Regulation.

Signing is supported on both desktop computers using USB tokens and mobile devices using NFC smart cards.

This add-on is particularly suitable for organizations handling highly sensitive documents or regulated business processes that require the highest level of legal assurance and trust.

eIDAS Qualified Timestamps

Adds a Qualified Electronic Timestamp to every electronically signed document in accordance with the eIDAS Regulation.

Qualified timestamps provide legally recognized proof of the exact time a document was created or signed while confirming that the document has remained unchanged since that moment.

All timestamps are issued by a Qualified Trust Service Provider (QTSP) in accordance with RFC 3161 and RFC 5816.

More information: <https://help.circularo.com/en/add-on-qualified-timestamps>

eIDAS Qualified Electronic Seals

Allows organizations to apply Qualified Electronic Seals to documents in accordance with the eIDAS Regulation.

Electronic seals verify the origin of a document, guarantee its integrity, and provide proof that it was issued by a specific organization.

This functionality is particularly suitable for automated document generation, invoices, certificates, confirmations, and other official corporate documents.

Liveness Check

Liveness Check provides an additional layer of protection for digital transactions. Recipients are prompted to record a short selfie video using their device's camera.

The system automatically verifies that the individual is physically present and protects against impersonation attempts involving photographs, prerecorded videos, masks, synthetic identities, or deepfake technologies.

This feature significantly increases the level of trust during identity verification and is particularly suitable for business processes requiring a high level of identity assurance.

Advanced Identity Verification (KYC)

Circularo provides advanced Know Your Customer (KYC) capabilities for verifying recipient identities before documents are accessed or signed.

ID Verification validates the authenticity and validity of government-issued identity documents.

Selfie-with-ID Verification compares the identity document photograph with a live image of the individual holding the document to confirm that the signer is its legitimate owner.

These verification methods can be combined with Liveness Check to create a multi-layer identity verification process tailored to the required security level of each transaction.

The solution supports thousands of identity document types from more than 190 countries, helping organizations meet regulatory requirements, reduce fraud, and strengthen trust in digital processes.

More information: <https://help.circularo.com/en/add-on-kyc-verification>

Online Document Editing and Collaboration (Collabora Online)

Collabora Online extends Circularo with real-time document creation, editing, and collaborative authoring directly within the platform, without requiring Microsoft Office Online.

The solution supports standard office document formats including word processing documents, spreadsheets, and presentations while allowing multiple users to collaborate simultaneously.

This add-on is particularly suitable for organizations that:

- do not have Microsoft 365 subscriptions including Office Online,
- are looking for a cost-effective alternative to Microsoft Office Online,
- want to create and edit documents directly within Circularo.

More information: <https://help.circularo.com/en/add-on-collabora-cdocs>

Note: Within a single organization, either **Microsoft Office Online** or **Collabora Online** may be used. Both solutions cannot be enabled simultaneously.

Licensing: Collabora Online licenses must be assigned to all internal users with access to the Circularo platform.

Microsoft Office Online is not included with Circularo and requires separate Microsoft 365 licensing.

Secure Document Management, Archiving and Search

This optional module extends Circularo with secure management and long-term archiving of documents that are not part of approval workflows or electronic signing processes.

Users can store documents in shared folders, organize them using folder structures and metadata, configure granular access permissions, and perform advanced full-text searches across all stored content.

Typical use cases include:

- contract management
- internal policies
- HR documentation
- technical documentation
- project documentation

- corporate knowledge repositories

The module is licensed per user and includes a predefined amount of shared storage at the organization level.

Note: Documents processed through Circularo approval workflows or electronic signature transactions are automatically archived without this add-on.

This module is intended for organizations that also wish to manage standalone business documents within Circularo.

SMS OTP – Two-Factor Authentication via SMS

Enhance the security of electronic signing and document access with optional two-factor authentication (2FA). Users verify their identity by entering a one-time password (OTP) delivered via SMS, adding an extra layer of security beyond standard authentication.

This solution helps organizations meet higher security and compliance requirements, reduces the risk of unauthorized access, and increases trust in the entire signing process. Since no additional applications need to be installed, SMS OTP is simple to use and suitable for both internal and external signers.

SMS Reminders

Accelerate approval and signing workflows with automated SMS reminders for pending tasks. The system sends reminder messages to signers, approvers, and other workflow participants, helping prevent delays and ensuring processes are completed more quickly.

SMS reminders are an effective complement to email notifications, particularly when a fast response is required or when users may not have immediate access to their email. By keeping participants informed through their mobile devices, organizations can achieve higher process completion rates, shorter approval cycles, and an improved user experience.

Appendix D - UAE Law and Legal Legislation

We have been working in the region with Governments, Gov. Departments, Courts, Investment Groups and many corporations to implement our modern Digital Transformation. Be it e-Correspondence, e-Contract Management, e-Archiving and Scanning or e-Signatures and Approvals, CIRCULARO provides all the key paperless capabilities and features that the users need.

Circularo is fully compliant with UAE laws and regulations. CIRCULARO is also compliant with strict US and EU laws and regulations such as the United States Electronic Signatures in Global and National Commerce (ESIGN) Act and the Uniform Electronic Transactions Act (UETA) and European Union there is The Electronic Identification and Trust Services Regulation (eIDAS Regulation 910/2014/EC).

Circularo is trusted by one of the most prestigious law firms in the [region Abdulla Al Awadi & Associates](#) that can provide any specific consultation your team can have.

As per [Federal Decree-Law No. 46 of 2021 on Electronic Transactions and Trust Services](#), which **repealed Federal Law No. 1 of 2006** as of January 2, 2022, and its [Executive Regulations \(Cabinet Resolution No. 28 of 2023\)](#) (effective June 2023):

- There is **no statutory exclusion list** of document types prohibited from using electronic signatures.
- Any previously stated restrictions (e.g. wills, deeds of title, long-term leases, negotiable instruments, notarial documents) **originated from the repealed 2006 legislation** and **do not form part** of the current legal framework.
- Therefore, all such document types **may now be signed electronically**, provided the signature meets the required standards (e.g. Reliable or Qualified Electronic Signatures issued by [TDRA-licensed Trust Service Providers](#)).
