

Strategic partnership & investment

**Digital trust technology for
enterprises and governments**

A strategic shareholder to expand adoption across its businesses and customer network.

Circularo today

Current ARR

≈ \$3M

Management approximation
As of [DATE TO CONFIRM]

2025 revenue

\$2.794M

Management-reported actual

2025 adjusted EBITDA

\$0.859M

Management-reported actual

Delivery

Managed SaaS, sovereign / self-hosted and shared services

Leadership

Founders continue as CEO and CSO (Chief of Sales)

CONFIRM [ARR date + financial definitions]

Add the ARR basis and EBITDA reconciliation so investors can assess recurring revenue and earnings quality.

Government and enterprise fit

TO ADD [a documented reason for selection]

A customer example would substantiate differentiation.

Customer-controlled deployment

Control over hosting and the data environment.

National identity integration

Connect workflows with UAE PASS and Nafath.

Multi-entity shared services

A common trust platform for participating organizations.

Process evidence and records

Retain approvals and execution history for review.

Deployment experience

Government and enterprise references support new opportunities.

Selected references

Enterprise customers

Emaar, ICD, RTA, EDGE Group, Ajman Bank and Ministry of Finance

TO ADD [one approved deployment outcome]

State the process, scope and measured result to show value beyond reference names. Confirm program naming.

Shared services and distribution

TDRA GovSign: Federal government digital signature services.

Digital Dubai DigiSign: Shared digital signature services across Dubai government entities.

Sharjah Sign: Shared digital trust services across Sharjah government entities.

e& DigiSign: Digital signature services supporting business customers.

Trust across an agreement process

Illustrative workflow. Applications and AI agents can participate through programmable capabilities.

A continuing record of decisions, execution and evidence

SaaS expansion

Deploy within the group and distribute through customer channels, then expand successful accounts.

TO ADD [partner adoption model]

Add eligible accounts, timing and retained ARR to test the commercial scale.

01

Group adoption

Identify suitable businesses and functions. Establish an initial deployment.

02

Customer distribution

Use account teams and relevant cloud, telecom or technology offerings.

03

Account expansion

Add users and workflows, including applicable AI and eDocs capabilities.

Sovereign shared services

References: TDRA GovSign, Digital Dubai DigiSign and Sharjah Sign

TO ADD [a sponsor-led deployment case]

Define entities, hosting, contracts and retained ARR to test whether this model can be repeated.

GCC and international expansion

Priority market	Potential partner contribution
UAE and KSA	Enterprise and government access, group adoption and a local commercial sponsor
Wider GCC	Relevant relationships and support for suitable deployments
Selected international markets	Customer access and resources for market entry and delivery

Expansion priorities. Market selection follows identifiable demand and partner capability.

TO ADD [priority markets + accountable sponsors]

Rank verified demand and delivery readiness to focus expansion on achievable opportunities.

Live AI and eDocs capabilities

AI document intelligence

Working with document information

eDocs

Structured digital document capabilities

Agentic execution

Governed participation by AI agents in digital processes

TO ADD [approved product demonstration or customer example]

Show one real workflow, its supported scope and commercial packaging to make the opportunity concrete.

Live status reflects management confirmation. Adoption scale and product-specific ARR are not supplied.

A joint ARR growth ambition

Current ARR

≈ \$3M

Management ambition

≈ \$9M

Management approximation

Within 2–3 years

Approximately \$6M of net ARR growth across the business

Management ambition, not a forecast. Partner contribution and timing remain to be validated.

TO ADD [a reconciled commercial growth model]

Show churn, expansion, new contracts, timing and delivery capacity to substantiate the ambition.

Preferred transaction (USD)

\$10–15M

Up to 25% minority ownership

Primarily founder secondary. Founders continue as CEO and CSO (Chief of Sales).

TO ADD [expansion funding + ownership plan]

Clarify any primary component and governance. Secondary proceeds go mainly to selling founders.

Commercial role: The shareholder could adopt the platform or distribute it to customers.

Shared ownership: Participation in the equity value created through successful expansion.

Flexible structure: Strategic fit remains central. Final terms and valuation are subject to agreement.

Execution commitment: An active commercial sponsor and an agreed plan turn access into deployment.

Potential future paths: IPO, private equity or a further strategic investment. Route and timing remain open.

Partnership discussion

Agree opportunities, commercial owners,
resources and an ARR plan.
